

## The introduction of mobile cursher

### 1. Mobile Crusher Application

The **Mobile Crusher**(mobile crushing and screening plants) is applied to multistage crush large materials, and then screen the discharges according to their different specifications. The whole set plants is widely used to mine, building material, highway, rail way and hydropower industries, etc., finish crushing and screening operations at one time, produce required size and output for consumers.

### 2. Mobile Crusher Features and Benefits

The **Mobile Crusher**(plants) has the advantage of reasonable matching, unobstructed discharge all line, reliable working, convenient operation, high efficiency and saving energy. Especially the mobility is very good, so it can extend with the raw material places or the construction place, and it can also make multiple matching, get to different product requirements.

### 3. Mobile Crusher Composition and working principle

The **Mobile Crusher**(mobile crushing and screening plants) is composed of primary crushing and screening station and secondary one, belt conveyor, etc. Every crushing station is an independent working unit, they can respectively assume their different responsibility, and the belt conveyer is responsible for material transmitting and piling up between each crushing station.

## brief introduction of Zhengzhou Yifan Machinery Co.,Ltd

Zhengzhou Yifan Machinery Co.,Ltd(the share-holder is Shande Technology (Beijing) Co., Ltd) has its headquarter in Beijing. It is a famous manufacturer of crushing and screening equipment and provides series crushing and screening equipment for customers, which includes hydraulic **cone crusher**, **jaw crusher**, **impact crusher**, **vertical shaft impact crusher**, vibrating screen and **mobile crushing and screening plant**. We offer not only products with good quality and competitive price, but also top service and solution.

We have many technical experts in domestic crushing and screening field, and possess the powerful ability in developing new products. We regard demands of customers as our motility and endlessly develop new products with high performance, which could satisfy the demands of customers and reach the world level.

We attach much importance to the quality of products, pursue perfection on the quality products and guarantee to produce the products of high quality with **ISO9001:2000** quality management system.

We have perfect after-sale service network. After strict train, the after-sale service engineer could offer customer the rapid maintenance service on demand. Moreover, we have our own foundry plant where lots of spare parts of the crushing and screening equipment are manufactured and many stored, which could offer customers spare parts conveniently.

郑州一帆机械设备有限公司

<http://www.yifancrusher.com>

With the rapid development of market home and abroad, our competitive ability enhances continuously, and our products have been broadly applied in the national key projects. In the course of construction of the national expressway network and the large-sale hydropower station, we offer the self-contained crushing plants lots of whole set of crushing and screening production lines, which could offer concrete aggregate of high quality.

While expanding the domestic market continuously, our equipment has been exported to Russia, Mongolia, Chile, Middle and East Asia, Africa, etc.

We insist on innovating, improving our equipment and enhancing its reliability constantly. We aspire to be the global brand in the crushing and screening field, and we are fully aware that our success is based on the success of our customers.
